Corporate Profile

TimberWest Forest Corp. is uniquely positioned as the largest owner of private forest lands in western Canada. The Company's 334,000 hectares, providing a sustainable annual harvest of 2.5 million m³ of logs, are located on Vancouver Island and predominantly support the growth of Douglas fir forests, a premium species used for structural purposes. TimberWest runs fully-contracted harvesting operations. With approximately 70% of the Company's logging now being done in second-growth stands, TimberWest leads the industry in the harvest of second-growth timber. Third party auditors have certified that the management of the Company's private forest land conforms to the objectives and performance measures of the American Forest and Paper Association's Sustainable Forestry Initiative (SFI[®]). The computation of the Company's recently revised long-run sustainable yield will be validated by the Company's external SFI[®] auditor, KPMG Performance Registrar Inc., in the first half of 2005. TimberWest also owns renewable Crown harvest rights to 0.8 million m³ of logs per year and operates a lumbermill located near Campbell River, BC. In addition, approximately 6,000 hectares of the Company's private forest lands have been identified as having greater value as real estate properties and are progressively being made available for higher uses.
