## JOB POSTING South Island – Field Engineer

**Reports To:** South Island Operations Planner

**Location:** Nanaimo

### The Position

TimberWest is a demonstrated leader in safety and innovation and seeks employees who share a progressive outlook and wish to participate in a high performance team. This position requires leadership and commitment to our safety and environmental management systems. Operations are throughout Southern Vancouver Island on TimberWest private lands centred in Nanaimo.

### Key Responsibilities

- Safety is a key focus for everyone at TimberWest - Leadership in safety through personal example, with a strong focus on achieving world-class performance in safety is key to all employees.
- Primary role is field layout, while directing contract engineering activities with Area Engineers.
- Ensure the quality of cut block layout and files through audits of contract engineering work, and assist in the delivery of the signed-off cut blocks to Contract Managers in a timely manner.
- Assist in the safe execution of the planned harvest where necessary
- Be available to provide support for Contract Managers and Area Engineers.

### Required Experience, Qualifications, Skills & Attributes

- Personal commitment to safety and environmental stewardship. Embrace personal health and safety as a priority and be in good physical condition.
- 5 years coastal forest engineering experience. Demonstrated competence as a logging engineer and practical knowledge of timber harvesting systems for old-growth and second-growth, timber quality
